* COAMFTE defines this as the percentage of graduates from the cohort year listed who *informed us* that they pursued and gained employment within 3 years of their graduation utilizing skills learned in accredited programs. Graduates that entered doctoral programs post-masters degree are NOT counted as "seeking employment" and therefore are not included in these data. For example, four of the six students from the 2016-2017 cohort sought (and obtained) full-time clinical positions, the other 2 students pursued (and were accepted) into doctoral programs.

** The pass rate represents the percentage of alumni that reported they had taken the national exam and if they passed.

***No students from the cohort that started during the 2016-2017 academic year have taken the exam at this time.
